STREET AND STORMWATER DEPARTMENT REPORT FOR THE MONTH OF MARCH, 2016

1. **STORMWATER PERMIT ACTIVITIES**

- a) Twenty (20) stormwater pollution prevention plan inspections were conducted at permitted construction sites.
- b) Five (5) Stormwater Individual Lot Permits were issued for new residential construction projects.
- c) One (1) Stormwater Management Permit was issued for a new development project.
- d) Initiated two formal enforcement actions for violations of the illicit discharge and construction site pollution prevention provisions of the Stormwater Ordinance.
- e) In collaboration with the White River Alliance hosted a rain garden workshop at Town Hall to educate residents on the purpose of rain gardens and how to build and maintain their own garden. 8 people attended the event.
- f) Participated in the coordination and presentation of a regional contractor's workshop through the White River Alliance to provide training on construction site stormwater pollution prevention. The training helps the town meet its NPDES stormwater permit requirements and is also intended to improve regulatory compliance on local construction sites. Approximately 185 people attended the event, 101 of which sat for "Trained Individual" certification testing.

2. **STORMWATER PROJECTS AND DRAINAGE**

- a) Design work continues on the construction plans for the Fourth Street Storm Sewer Improvement Project. Meetings will be scheduled with affected property owners as-appropriate during this process. Construction is anticipated to begin in August.

3. **96TH ST./ZIONSVILLE RD. INTERSECTION IMPROVEMENTS**

Design work is complete and right of way acquisition is ongoing on this Boone County Economic Redevelopment Commission funded project which will realign the existing intersection, provide additional lanes through the intersection and

modernize the traffic signal equipment. Construction is now anticipated to begin in the summer of 2016, but land acquisition will dictate the project timeline.

4. BLOOR LANE PATHWAY

Design work is complete as is right-of-way engineering. Instruments for the conveyance of new right of way are expected to be provided by April 8th, after which meetings with individual property owners will be set to discuss final project elements and execute said conveyance documents. Construction is expected to begin in the summer of 2016.

5. FORD RD. ROUNDABOUT LANDSCAPING

The landscaping has been installed by a local Eagle Scout candidate.

6. OAK ST. AND KISSEL/800 E. INTERSECTION

The evaluation by the Town Engineer of this intersection and recommended improvements has been completed and submitted to the town. The findings support and recommend a temporary traffic signal until such time as a permanent roundabout can be funded. The Town Engineer has been directed to prepare a proposal to design the signal as well as an estimate of probable construction costs. Although the funding for this evaluation was included in the 2016 budget, no other funds have yet been appropriated. Staff will work with the Mayor to identify potential funds to pay for design and construction.

7. ZIONSVILLE RD. PROJECT

The Boone County RDC is in the process of refinancing the Browning TIF (commercial area at the northwest corner of 96th St. and Zionsville Rd.) bond to generate funds to pay for local road projects in Zionsville. Through discussions between Zionsville and county staff and officials, it has been determined that the Boone RDC will initially fund all phases of an upgrade to Zionsville Rd. The bond placement is scheduled for the May timeframe, after which the BRDC will enter into a design contract with an engineering firm of their selection. Town staff and Mayor Haak will lead the design effort to ensure this project fits the needs of the town. Although no design work has begun, a preliminary meeting with six (6) residents along Zionsville Rd. was held on February 25th to discuss general elements. It is currently anticipated that the project will consist of widening the two existing vehicle lanes to 12 feet each and provide a bicycle lane in both directions of 5 feet. There are currently no plans to provide any additional travel lanes. Sidewalks, paths, drainage and other elements will also be considered as the design process unfolds. This project is currently planned to begin at 106th St. and continue south, tying into the current intersection reconstruction project at 96th St.

8. HEAVY TRASH COLLECTION

The annual collection of heavy trash in the urban service district has been set for the week of May 9th. This is an opportunity for residents to dispose of non-hazardous household items that are not normally collected with their weekly trash service. Collection will again be on residents' regular trash day during this week. Information and details have been posted on the Town's web site and will be provided to the Times Sentinel. Residents may contact the Street and Stormwater Department directly for this information as well. As with previous years, there will be no charge to residents to dispose of tires or refrigerant-bearing appliances. However, residents wishing to dispose of these items are

requested to notify the Street Department as the collection process differs from standard heavy-trash items.

9. BRUSH AND LIMB COLLECTION

The spring round of brush and limb collection for Zionsville residents in the urban district has been scheduled for the weeks of April 18th and April 25th. The specific schedule has been posted to the Town's web site and has been provided to the Times Sentinel. Residents may contact the Street and Stormwater Department for their specific day of collection, and the schedule is attached to this report.

PUBLIC NOTICE

Spring 2016 Brush & Limb Collection

The Town of Zionsville's Street & Stormwater Department will be providing curbside Brush & Limb Collection **beginning Monday, April 18, 2016**. This service provides Zionsville residents in the Urban district a means to dispose of certain spring pruning and yard debris. We cannot guarantee the collection unless your items are out curbside by 7:30 a.m. on your designated pick-up day.

The limit on size is 6 inches in diameter and smaller. Grass clippings, leaves, decorative grass, vines, stumps, root balls, construction lumber, firewood, and wooden fencing material will **NOT** be collected. Bundling is not required. Limbs up to 6 inches in diameter may be left intact but should be no larger than can be managed by one person.
